

Job offer in In Vivo Preclinical Imaging

Scientists in the field of:

- **radiodiagnostics (CT, PET, SPECT)**
- **optical imaging (fluorescence, luminescence)**
- **magnetic resonance (MRI)**
- **magnetic particle imaging (MPI)**
- **ultrasound (US)**
- **photoacoustics (PA)**

CAPI team would like to invite new colleagues to our young, dynamic and very friendly collective. Our center is fully equipped with high-end instrumentation allowing us to combine a variety of *in vivo* imaging methods on small laboratory animals (mice, rats) for preclinical research.

Who are we looking for?

We are looking for an independent, open-minded and hard working soul with strong interpersonal skills.

You should have a master's degree in life sciences, medicine or some technical field.

Preferably interested in all of these. You should be open to permanent education. You need to be flexible, effective and precise. Good english knowledge is compulsory. Previous experience with imaging methods or laboratory techniques is welcome as well as knowledge of basic physics, chemistry, or image processing.

What can we offer?

- Full time, 1-year contract with a possibility of prolongation.
- Modern lab in the Prague center.
- Participation in interesting research topics.
- Professional growth.
- Competitive salary, 5 weeks of vacation, meal vouchers.

What you need to do now?

Just send your CV and motivation letter to **sefc@cesnet.cz**
